

Abhishek Pandey

Dallas, Texas | pandey.abhishek2054@gmail.com | (945) 274-4842

Research interests Applied Econometrics, Causal Inference, Machine Learning in Economics, and Health Economics

Education

PhD in Economics , The University of Texas at Dallas	Expected 2027
MS in Economics , The University of Texas at Dallas	2024
MA in Economics , Tribhuvan University	2022
BE in Mechanical Engineering , Tribhuvan University	2018

Research Experience

The University of Texas at Dallas Aug 2023 – Present
Research and Teaching Assistant | Selected research in progress

Policy evaluation using administrative data | Medicare spillovers

- Built a 2007–2024 panel of 296 U.S. counties linking sanctuary-policy dates, Medicare outcomes, and workforce data; assessed enforcement changes using a separate sample drawn from ICE detainer records.
- Estimated policy effects with staggered-adoption difference-in-differences in Stata; assessed pre-treatment trends, state-level dependence, multiple testing, and sensitivity to adoption timing and influential states.

Diagnostics for treatment-effect heterogeneity | *With Donggyu Sul*

- Developing diagnostics to assess control group stability and identify cases where quantile treatment effect needs to be estimated in addition to average treatment effects, with a sieving procedure for selecting distributionally stable controls.
- Evaluated diagnostic performance with Monte Carlo simulations with design across panel sizes; applied the framework to Mexico's Seguro Popular health-insurance reform.

Choosing and implementing distributional causal methods

- Surveyed distributional and quantile treatment estimators and implemented an R-based comparison of quantile treatment-effect estimators using 2,360 counties; examined sensitivity to identifying assumptions and treatment-assignment clustering.
- Developed reproducible estimation and state-cluster bootstrap scripts with placebo and leave-one-state-out checks; preserved random seeds, estimates, and bootstrap outputs.

Technical Skills

Programming R, Stata, Python, MATLAB

Methods Difference-in-differences, synthetic control, regression discontinuity, event studies, quantile treatment effects, Monte Carlo simulation, bootstrap inference, and experimental design.

Selected Graduate Coursework and Training

Econometrics I and II; Microeconometrics; Statistical and Machine Learning; Python Programming for Social Science; Data Visualization; Information Economics and Mechanism Design.

Additional training Econometrics at Emory — Causal Inference with Panel Data, Pedro Sant'Anna; Data Science: Foundations using R, Johns Hopkins University.

Additional Experience

The University of Texas at Dallas

Aug 2023 – Present

Instructor and Teaching Assistant

- **Instructor:** ECON 4355 Econometrics (Fall 2026); ECON 4351 Mathematical Economics (Summer 2026; Summer 2025).
- **Teaching Assistant:** ECON 6309 Econometrics I, ECON 7309 Econometrics II, and undergraduate economics courses through teaching, review sessions, and analytical guidance.

Retro Engineering Consult Pvt. Ltd.

Jul 2020 – Jun 2023

Junior Economic Officer

- Analyzed project expenditures and helped reduce costs by 15%; conducted socioeconomic analysis for bids on two town-planning projects.
- Coordinated construction planning and execution, helping reduce completion time by 20%.

Thapathali Campus, Tribhuvan University

Nov 2019 – Sep 2022

Assistant Lecturer in Mechanical Engineering

- Taught Engineering Economics, Industrial Engineering and Management, and other engineering courses; supervised two research projects and coordinated with Coursera for certification-course access for 1,500+ students.

Adwell International Pvt. Ltd.

Oct 2018 – Jun 2020

Research Engineer

- Used design of experiments to evaluate cookstove performance; prepared a successful bid for an approximately \$200,000 project and supervised fabrication and rural distribution.

Leadership

Young Economists Society Nepal

Nov 2019 – Dec 2021

Co-Founder and President | Nepal Economics Olympiad Program Manager

- Organized the 2020 and 2021 Olympiads, leading 22+ team members and engaging 500+ students from 70 colleges in the inaugural year.
- Delivered financial literacy training to 1,000+ students with commercial banks; mentored national representatives who earned two International Economics Olympiad bronze medals in each year.
